AVY Project

About Avy

Our worlds are changing rapidly, we must adjust to the new digital world. Welcome to The Avy Project, where community meets blockchain and we change people's lives through our Academy, Avy Marketplace, NFT community projects, unique mining devices, our Internet and Avy network services and our Token that links it together.

Imagine a world with equalization, a fairness system that enables marginalized communities' access to training and education and then having the opportunity to utilize their skills for sustained independence. A learn to earn system. We have longed for the change to create a solid business to change people's lives.

Our blockchain will enable a Token that will be linked to nominated social impact programs that enable lifelong change. Using Cryptocurrency ensures our community has a share in the latest opportunities to be progressive in their ability to create independence.

Do you see an equalized world?
